

Alternatives to banned plastic products

New rules on single-use plastics to reduce marine plastic litter

With the implementation of a plastic ban entering into force on July 3, 2021 as one initiative to reach cleaner waters, the EU has changed the platform on which we operate. Single-use plastic cutlery, plates, stirrers and straws along with cups, food and beverage containers made of expanded polystyrene (extruded polystyrene is still allowed) will be forbidden.

In line with ABENA's philosophy of finding the right solutions for our customers' needs, we would like to equip you with the best possible tools of figuring out which other products and materials to choose as replacements for the soon-to-be banned products. To do so, we have created a mini-catalogue for easy navigation and selection in our vast assortment of possible alternatives.

Bagasse

Leftover fibers from sugar cane production, which are 100% natural. Products in bagasse are very sturdy, well suited for hot and cold foods as well as for heating in the microwave oven and comes in many attractive designs providing a premium alternative.

Wood

An eco-friendly choice because of its origin and therefore fully biodegradable and compostable. Furthermore, wood being a clean label alternative, also has the advantage of being 100% renewable.

Reusable

As a contrast to traditional disposable tableware, reusable and washable products made of 100% recyclable PP is also an option to choose. Tested and passed up to 125 washing cycles according to EN 12875-1:2005 make the products completely dishwasher-safe. By choosing reusable in PP, you get a circular, lighter and unbreakable alternative to glass and porcelain.

Paper/cardboard

With its natural origin and wide selection, ranging from 100% natural to various coating options, paper is a cost effective alternative without compromising too much on functionality.

Single-use plates
in plastic and with
a plastic coating

Plates

Bagasse Plates, Abena Gastro

Item number	Dimensions	Features	Color	Material	Pcs per pk

ABENA GASTRO REUSABLE PLATES

- Dishwasher safe – tested and passed 125 washing cycles according to EN 12875-1:2005
- Unbreakable – unlike traditional tableware such as glass and porcelain
- Less CO₂ emissions compared to regular plastic disposables
- Lighter than glass and porcelain – no heavy lifting

Rethink your plates

It's all in the coating

As of July 2021, single-use PE coated paper plates will be banned in the EU.

When there is a need for single-use paper plates that can hold moisture and grease, one of the options is actually the most natural of them all:

Paper plates, coated with natural starch.

ABENAs new paper plates are environmentally friendly, without compromising quality. The plates are fully biodegradable, compostable, free of OBA and with no flourinated chemicals.

FAQ

All Q&A's below relate to the EU Directive 2019/904 concerning reduction of the impact of certain plastic products on the environment (also known as the SUP = single use directive) and therefore there might be additional local government initiatives on limiting consumption on not-to-be banned single-use products

Will single use plastic cutlery, straws, plates and stirrers be banned?

YES

Will multi-use/reusable plastic cutlery, straws, plates and stirrers be banned?

NO

Will single-use cups be banned?

NO

Will single-use plates with a plastic lining/coating be banned?

YES

Will single-use paper cups with a plastic lining/coating be banned?

NO

Will PLA products in general be banned?

NO

Will single-use PLA cutlery, straws and plates be banned?

YES

Will portion cups be banned?

NO

Will XPS be banned?

NO, therefore menu boxes and trays in XPS will still be available

Will the ban be material-specific?

NO, only EPS and oxo-degradable materials are subject to the ban

Will EPS be banned?

YES, therefore EPS hot cups and soup cups will not be available

FSC™ (Forest Stewardship Council) is an international non-governmental organization dedicated to the promotion of responsible forest management worldwide. FSC™-certified products are made from raw materials from well-managed forests and responsible sources. The label's traceability and integrity are upheld through stringent control measures, and by choosing FSC™-certified products, you help take care of forests and the people and wildlife that call them home.
